How much does staff time cost?

ex. ($120,000 ÷ 240 = $500 per day***)

[ ] ÷ 240 = [ ]

salary+benefits+overhead   work days   per day

*Total cost per employee includes salary plus benefits, overhead, and other related costs, which often exceed 100% of salary. Based on that, office staff with a $60,000 annual salary have a $120,000/year total cost. **One day is equal to 8 hours. *** Driver costs assume that drivers aren't paid for attending meetings, but lunch and other refreshments are provided. If drivers are paid for their time, add that cost in as well. †Registration fee only. Third party vendor fees do not include staff time to register, operations time for rescheduling, or driver pay.
